

Neuroelectrics® is a digital brain health company that innovates at the intersection of neuroscience, physics, machine learning and hardware in order to have real, positive impact and improve the quality-of-life of patients. Neuroelectrics' Quality Policy is to implement and continuously improve all the necessary processes and procedures to ensure that excellence is achieved in the provision of our technologies, products and services and that our customers needs and expectations are consistently met or exceeded.

Neuroelectrics senior management guarantees that the quality policy and resources provided are appropriate for purpose and sufficient to comply with our clients requirements and current regulatory requirements in all territories in which we operate. Quality Objectives shall be monitored continuously and reviewed annually.

Values:

1. Start with a real important problem
2. Demo or die
3. One little step at the time, but always forward
4. Work hard, be humble and seek perfection
5. Worship Creativity, Interdisciplinarity, Quality and Excellence
6. Build for others and leave a trace. Be concise
7. Be honest with yourself and others
8. Don't work alone. Be a team player
9. Read and never stop learning
10. Have fun: life is short, at least for now
11. Break the rules. Innovate
